Galaxy S24 Ultra SM-S928B/DS (SGS24U SM-S928B/DS) All-in-One (AIO) Version 1 (V1) 2026 March 8th By eB Publications

Introduction

The **Samsung Galaxy S24 Ultra (SM-S928B/DS)** is Samsung's 2024 flagship Android smartphone, designed for power users, creators, and professionals. It combines a large, vibrant display, beast-class performance, an industry-leading camera system, cutting-edge connectivity, and productivity features like the built-in **S Pen** — making it a true all-purpose device.

Why it matters:

- Sets the bar for Android flagship performance.
- Massive 200 MP camera system for pro-level photography.
- Seven-year software support promise.

Blueprint

A structured overview of the phone's capabilities:

1) Display & Design

- 6.8" Dynamic AMOLED 2X, QHD+ (3120×1440), 120 Hz refresh rate.
- Corning Gorilla Armor for durability.
- Flat screen optimized for the **S Pen**.

2) Performance & System

- Qualcomm **Snapdragon 8 Gen 3 for Galaxy** octa-core chipset.
- 12 GB RAM & storage options up to 1 TB.
- Android 14 with Samsung One UI 6.1.

3) Camera & AI Imaging

- Quad camera system: 200 MP main + telephoto + ultrawide + second telephoto.
- AI-powered ProVisual engine for enhanced photos and videos.
- Extensive optical and “quality” zoom modes.

4) Productivity & Connectivity

- Integrated **S Pen** support for notes, sketches, and precision controls.
- Connectivity: 5G, Wi-Fi 7, Bluetooth, NFC, UWB.
- Dual SIM (physical + eSIM).

5) Battery & Charging

- 5000 mAh battery with fast wired and wireless charging.
- Wireless PowerShare and Qi wireless support.

 Cheat Sheet (Quick Specs)

Feature	Detail
Model	Galaxy S24 Ultra – SM-S928B/DS (Dual SIM)
Display	6.8” QHD+ Dynamic AMOLED 2X, 120 Hz
Chipset	Snapdragon 8 Gen 3 for Galaxy
RAM	12 GB
Storage	256 GB / 512 GB / 1 TB options
Main Camera	200 MP + telephoto + ultra-wide + telephoto
Front Camera	12 MP
OS	Android 14 + One UI 6.1
Battery	5000 mAh with fast & wireless charging
Build	Titanium frame, IP68 water/dust resistance
Extras	S Pen, Galaxy AI tools, 7-year updates

Quick FAQs

Q: What does SM-S928B/DS mean?

It's the **international dual-SIM version** of the S24 Ultra — capable of using two SIMs (physical and/or eSIM).

Q: How does this compare to regular S24?

The Ultra has a larger QHD+ display, more RAM/storage, advanced camera tech, and **S Pen support**, which the standard S24 lacks.

Q: Is the screen durable?

It uses **Corning Gorilla Armor** for improved scratch resistance, but a screen protector can help preserve the anti-glare coating.

Features that Matter Most

Pro-level imaging

- 200 MP main camera with improved AI processing.
- Multiple optical and hybrid zoom ranges for flexible shooting.

S Pen integration

- Natural handwriting, drawing, and productivity workflows without losing pocket size.

AI & Smart Tools

- Enhanced photo and video editing.
- Galaxy AI features like language tools and content assist.

Extensive support

- Samsung promises up to **7 years** of software and security updates.
-

What to Expect in Everyday Use

Pros

-  Excellent performance for gaming, apps, and multitasking.

- ✓ Top-tier camera flexibility and quality.
- ✓ Long update support.
- ✓ Premium design and durability.
- ✓ Productivity-ready with S Pen.

Cons

- ✗ High price point (flagship class).
 - ✗ Big and heavy for some users.
 - ✗ AI features still evolving in real-world use.
-

Final Thoughts

The and similar variants represent Samsung's pinnacle of smartphone engineering in 2024:

- **Performance:** Rock-solid for anything you can throw at it.
- **Camera:** One of the most versatile and powerful systems available.
- **Productivity:** Unique S Pen experience among flagship phones.
- **Longevity:** Extended software support sets it up for a long life.

GLOSSARY

- CPU vs chipset: The CPU acts as the "brain" that performs calculations, while the chipset acts as the "nervous system" or "traffic controller" that manages data flow between that brain and all other components.
- ASML originally stood for Advanced Semiconductor Materials Lithography. The company was founded in 1984 in the Netherlands as a joint venture between ASM International and Philips. Over time, it dropped the full name and is now known simply as **ASML**. It is the world's leading supplier of photolithography machines used in semiconductor manufacturing, most notably its extreme ultraviolet (EUV) lithography systems. **ASML** is the only company that can make the most advanced computer chips because they spent over 30 years and billions of dollars developing a single, incredibly difficult technology called Extreme Ultraviolet (EUV) lithography. **ASML** does not actually make chips. ASML makes the machines that other companies use to manufacture chips.
